

1. PURPOSE

This document certifies the extent to which the NordBase EV charger Foundations, manufactured by Nordinfra Systems, complies with the domestic content requirements of the Build America, Buy America Act (BABA), for use in evaluating eligibility for federally funded infrastructure projects, including NEVI-funded EV charging installations.

2. PRODUCT & PROJECT INFORMATION

Product	NordBase AC, NordBase Small, NordBase Medium
Manufacturer	Nordinfra Systems
Project / Customer	[To be completed per order]
Purchase Order No.	[To be completed per order]

3. DOMESTIC CONTENT SUMMARY

- ☒ Steel (foundation shell, base plate): melted and manufactured in the United States
- ☒ Coating (ZM115, Zinc-Aluminum-Magnesium): applied to domestically melted and manufactured steel per ASTM A1046
- ☒ Fabrication (laser cutting, kerf-fold assembly, pop-riveting): performed at a U.S. manufacturing facility
- ☒ Fasteners (5/8"-11 stud bolts, nuts, washers): [country of origin — to be confirmed per supplier]

All structural steel components meet the BABA "melted and poured" domestic standard for iron and steel products. Nordinfra sources its ZM115-coated steel domestically to ensure compliance with this requirement.

4. LIMITATIONS & BUYER RESPONSIBILITY

Final determination of BABA compliance for a specific project rest with the awarding federal agency or pass-through entity administering the funding. This certificate provides manufacturing origin information to support that determination but does not itself constitute a waiver, approval, or guarantee of eligibility for any specific project or funding source.

Buyers using this product in connection with federally funded projects are responsible for confirming applicable requirements with their contracting agency, including any minor components exemption thresholds or project-specific waivers that may apply.

This certificate applies to the foundation system as described above. Third-party accessories (e.g. bollard, bollard base cover) are covered by separate certification where applicable, and country of origin may vary — confirm compliance separately if required for project funding.

5. CERTIFICATION

I certify that the information provided in this document is accurate to the best of my knowledge as of the date below, based on information provided by Nordinfra's material and fabrication suppliers.

Name:	Simon Gullberg	Title:	CTO & Co-Founder
